**Call us at 269-657-4921**

Thank you for choosing EVERLAST labels, the original permanent metal garden label manufacturer, serving gardeners since 1937.

We are proud of the fact that our products are made in the USA with American-Made materials. We strive to offer you the best in products and service, and we welcome your comments and suggestions. Please feel free to share your feedback by emailing us at **[sales@everlastlabel.com](mailto:sales@everlastlabel.com)**.

Happy gardening from your friends at Paw Paw EVERLAST Label Company!

### **COPPER NAMEPLATES**

We offer copper nameplates as an upgrade option for our label styles A, C, E, F, and M. The Copper C nameplates are soft enough to be embossed; however, the other styles are made with half-hardened copper and are too hard to emboss. We recommend the DecoColor Marker to mark them.

### **HEAVY DUTY NAMEPLATES**

We have moved to heavy duty nameplates for our label styles A, E, F, G, K, and M. They are interchangeable with the regular (thinner) nameplates that we used to offer.

### **STAINLESS STEEL WIRES**

Because some soil is particularly acidic and some environments more harsh, we offer a stainless steel upgrade for our wires. Stainless steel is considered a corrosion-resistant metal as it does not rust when exposed to the elements. It will last longer than our original galvanized wire.

### **MARKING PRODUCTS**

We recommend our marking products for your garden labels. The Mechanical Pencil makes the boldest print, and refills are available. The Black Marking Pencil makes a fine line allowing for more to be written on the name plate. The DecoColor Marker is suggested for use on copper plates.

### **ALUMINUM DOOHICKEY TAGS**

We now offer an aluminum tag similar in size to our style B label. It is made of a thicker grade aluminum and can be marked with a regular #2 pencil.

### **COATING THE NAMEPLATES**

Whether using our marking products, Brother P-Touch labels, or other methods to mark your garden labels, you can give them an added level of protection when they are exposed to more extreme conditions. Some customers have shared their success in coating the nameplates with Permalac (a clear, air-dry lacquer), while others have used an exterior polyurethane.

*Note: We have worked hard to improve our garden labels; however, metal garden labels may still contain sharp edges.*
